

Please join us for this live webinar
COVID-19 IN THE AMERICAS: THE EMERGING CRISIS IN BRAZIL
THURSDAY, JUNE 25 | 2:00 - 3:30 PM EDT

UNIVERSITY OF MIAMI
INSTITUTE for ADVANCED
STUDY of the AMERICAS

Brazil is now a global hotspot for the COVID-19 pandemic, with more than 1,000 deaths a day. President Bolsonaro's failure to respond to the pandemic places the burden on state and local governments to mitigate the spread. Please join us as experts present new data from the Observatory of COVID-19 in the Americas, which tracks states' public policy responses to the pandemic and from the Epicovid19, the first study to assess the prevalence of coronavirus in Brazil.
